

## **Let's make the world a better place!**

Amzărescu Alexia Gabriela  
Palca Popescu Andrei David  
Tănasie Iris Gabriela

The world we live in should be a better place for all of us. We should think about our children's future first of all and then about us. We should provide them a clean environment with beautiful waters and green places to play around, fresh air and noisy bees. But how can we do that? By reminding us every day that the world is the only place which brings us the necessary means of living. Here are some examples of what we must do and must not do to our planet:

Considering that the birds are resting on that island, we should stop polluting and keep the island clean.

When we go on a picnic and enjoy the green grass, we have to be responsible and clean.

Aluminum boxes like beer and juice decompose in 200 years, so we must not leave them on the grass, but throw them in the trash.

If we were more careful and recycle more, slowly we would stop pollution.

**Stop pollution, this is our message!**
